UPDATES

- APS - PREVENTS LOSS OF 3RD & 6TH Gear by installing the latest design snap ring in the case. The snap ring is 27% greater in thickness which increases retaining force ensuring the snap ring remains engaged
- To prevent leaks between the underdrive/overdrive and reverse clutch, Solid PTFE stator support seals are used. PTFE seals are superior to the OE steel seals in separating these hydraulic circuits.
- 100% of Replacement of all bushings - High wear
- 100% low drum replaced with updated later design OE
- Updated valve body kits are used to assist with common shifting concerns

100% Dyno Tested - insures trouble free installation
